SUBJECT: Evidence 99-7625

In May 2007 several evidence items were returned or destroyed as phase one of the evidence disposition in this case.

After consultation with the County Attorney's Office and Sheriff Ted Mink it was determined that all the remaining evidence in this case would be destroyed. On December 16, 2010 Evidence Vault Supervisor Erik Jansson, Investigative Specialists Juan Esqueda and Kathy Ireland and I responded to the South Vault where the Columbine evidence items were stored. The boxes of evidence were still sealed with my initials from the May 2007 inventory. All of the boxes were then opened and the evidence items were separated into three categories depending on the method of destruction. After the sort was complete the boxes were sealed and I initialed the seals on each box.

On December 27, 2010 at about 10:00 a.m. I transported all of the combustible evidence, ammunition and casings to the Jefferson County Explosives Range and met with Deputies Rick Searle and Mark Miller. The seals on the boxes with my initials were still intact. I then watched as all these items were destroyed.

On December 29, 2010 at about 8:00 a.m. Supervisor Jansson, Evidence Custodian Kimberly VanNorman, Internal Affairs Investigator Paul Magor and I transported all of the evidence items that could be burned to the Denver International Airport (DIA) incinerator. The seals on the boxes with my initials were still intact. All of the boxes of evidence were placed in the two incinerators and we waited about 1½ hours until the evidence was fully engulfed in flames, ensuring its destruction.

On February 16, 2011 at about 8:36 a.m. Supervisor Jansson and Internal Affairs Investigators Paul Magor and Randy Klein transported the remaining evidence items which consisted of the guns, clips and inert pipe bombs, to Western Metals. All of these items were then crushed.

SUBJECT: Evidence 99-7625

On May 19, 2007 Investigative Specialist Juan Esqueda and I completed an inventory of all evidence remaining in case 99-7625. Evidence Supervisor Erik Jansson was present throughout the inventory.

Prior to the inventory and after consultation with the County Attorney's Office, Sheriff Ted Mink and Undersheriff Ray Fleer, several items were identified that could be returned to their owners and/or destroyed. During the inventory of May 19th those identified items that were to be returned to their owners were placed in separate boxes, sealed and will be stored in the evidence vault until they are picked up. The items that were slated for destruction were placed in separate boxes which were sealed in boxes and I initialed each seal. One separate box was filled with fireworks and other combustible evidence.

All of the evidence to be retained in this case was reorganized and placed into new boxes. Each box was sealed with evidence tape and I placed my initials and the date on each seal. I have forwarded a list of item numbers contained in each of the 19 boxes to the evidence vault for their records.

On May 22, 2007 all of the propane tanks associated with this case were removed from the Hazardous Material Conex Evidence Storage by Jansson. Deputy Ricky Searle then transported these items as well as the box of combustible items to the Jefferson County Explosives Range where we met with Critical Incident Director Mark Gutke. Jansson and I then watched as these items were destroyed using current Bomb Squad procedures.

On May 23, 2007 I met with Criminalist Manager Chris Loptien and we went through several boxes of photographs and video tapes that were duplicates of those already in evidence. All of the duplicates were placed into two boxes for destruction. The boxes were sealed and I initialed each seal.

On May 24, 2007 Jansson, Evidence Technician Susan Scohy and I transported all nine remaining boxes of items slated for destruction to the Denver International Airport incinerator. All of the seals that I had signed were still intact. Jansson and I then placed all the boxes into the incinerator and waited about 1½ hours until the evidence was fully engulfed in flames, ensuring its destruction.

On May 24, 2007 I forwarded a complete list of every piece of evidence in this case to the evidence vault that will represent a full accounting of each item as well as a disposition for those items destroyed or returned to owner. Those items in black represent all evidence items that have been

retained and were accounted for during the inventory on May 19, 2007. The items in red represent those items that were destroyed and those items to be returned to owner. The items in green represent those items that were previously returned to owner or destroyed.

Evidence Vault Supervisor

Internal Affairs

FROM: Kate Battan, Investigator *KB*
Criminal Investigations Unit

DATE: February 16, 2011

SUBJECT: Evidence 99-7625

In May 2007 several evidence items were returned or destroyed as phase one of the evidence disposition in this case.

After consultation with the County Attorney's Office and Sheriff Ted Mink it was determined that all the remaining evidence in this case would be destroyed. On December 16, 2010 Evidence Vault Supervisor Erik Jansson, Investigative Specialists Juan Esqueda and Kathy Ireland and I responded to the South Vault where the Columbine evidence items were stored. The boxes of evidence were still sealed with my initials from the May 2007 inventory. All of the boxes were then opened and the evidence items were separated into three categories depending on the method of destruction. After the sort was complete the boxes were sealed and I initialed the seals on each box.

On December 27, 2010 at about 10:00 a.m. I transported all of the combustible evidence, ammunition and casings to the Jefferson County Explosives Range and met with Deputies Rick Searle and Mark Miller. The seals on the boxes with my initials were still intact. I then watched as all these items were destroyed.

On December 29, 2010 at about 8:00 a.m. Supervisor Jansson, Evidence Custodian Kimberly VanNorman, Internal Affairs Investigator Paul Magor and I transported all of the evidence items that could be burned to the Denver International Airport (DIA) incinerator. The seals on the boxes with my initials were still intact. All of the boxes of evidence were placed in the two incinerators and we waited about 1½ hours until the evidence was fully engulfed in flames, ensuring its destruction.

On February 16, 2011 at about 8:36 a.m. Supervisor Jansson and Internal Affairs Investigators Paul Magor and Randy Klein transported the remaining evidence items which consisted of the guns, clips and inert pipe bombs, to Western Metals. All of these items were then crushed.

Per Kate. These are not

photos but actual objects destroyed

In addition to the one below, I have questions about items 4033 and 4034. They are both photos, yet appear on the Destroyed 05/24/07 list. Where they really destroyed, or are they filed in lab with the rest of the photos?

Not sure. In reality, it never was a piece of evidence, it was more an administrative documentation so we knew where the photo was taken.

Subject: RE: columbine question

The "photo only" was entered into the system because they were given evidence numbers to match with the photos (for instance, bullet holes). So it was never a real piece of evidence it just documented with a photo but we wanted a number so we knew which bullet hole it was. We still have those photos as part of the crime scene photos.

Only a few of the evidence teams did it that way. The rest just took photos and created a photo log (which is how it should have been done).

So, what we had in the vault were the duplicates? So of these have no description – they say, "Photo Only" or just photo. Others give a description such as "green jansport backpack" – photo only. Do I have to show any of these as being sent up to the lab?

In addition to the one below, I have questions about items 4033 and 4034. They are both photos, yet appear on the Destroyed 05/24/07 list. Where they really destroyed, or are they filed in lab with the rest of the photos?
